■ “*Inoculations: the True Weapons of Mass Destruction causing Vaccine Induced Diseases (An Epidemic of Genocide)* NOT published in any medical journal (as it would be a conflict of interest for the pharmaceutically controlled medical profession to admit they are creating disease). However, this article has been published on thousands of websites, and many “alternative medicine” publications.

■ “*Response Of Rebecca Carley, MD to CDC’s Public Health Protection Research Guide 2006-2014*”, submitted Jan 2006. According to the CDC, public comments will be “posted in near future” (still waiting for that to happen; the internal link to my document on the CDC site which initially existed for CDC affiliates to respond to it has since been disabled by the CDC after 100 pages of comments were submitted which were unable to refute the contents of said paper).

■ “*Critique of the Federal Court Decision in the Hannah Polling Autism Case*” proves that Hannah's autism was caused by vaccine induced encephalitis caused by the MMR vaccine (which has never had mercury). In fact, she even came down with chicken pox after receiving the chickenpox vaccine.
